

HSRPLUS™

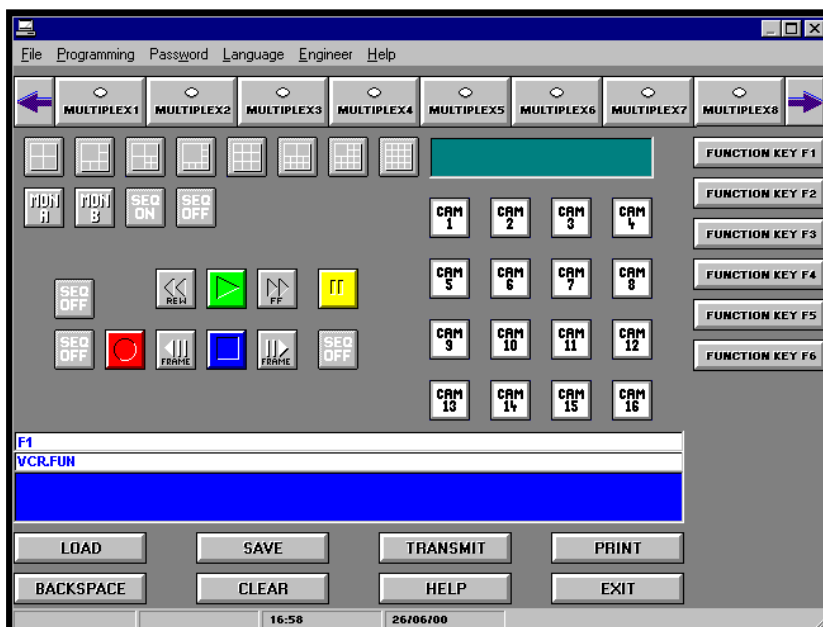

DATA SHEET

HSRPLUS is a software package that allows PC control of certain products in a CCTV system. It is part of the "PLUS" range of software, which controls most multiplexers and digital recorders.

The HSRPLUS software specifically controls the SONY HSR range of digital recorders. It can be easily retrofitted in an existing system.

HSRPLUS software benefits users of CCTV systems that include 1 or more digital recorders. Its unique features offer key benefits to the CCTV system user and installer.

- ◆ Automatic timers ensure potentially crucial recording operations in a CCTV system are controlled automatically, not left in the hands of operators. Key recording and digital recorder settings are software controlled ensuring the CCTV system records correctly at defined times and after defined events. Preventing recording errors is a crucial facility lacking in most CCTV systems.
- ◆ Using software means digital recorders are not physically required on the control desk. Operators can concentrate on key tasks. Control for the whole CCTV system, are in one place, on the PC.
- ◆ Pre-programmed digital recorder functions in the software allow immediate set up of the function keys from any of 30 pre-programmed choices. This means accurate and quick set-up, maximising the full extent of the digital recorder's capabilities.
- ◆ Control over a computer network gives multiple users control of the CCTV system. Each PC with network control must be running HSRPLUS.

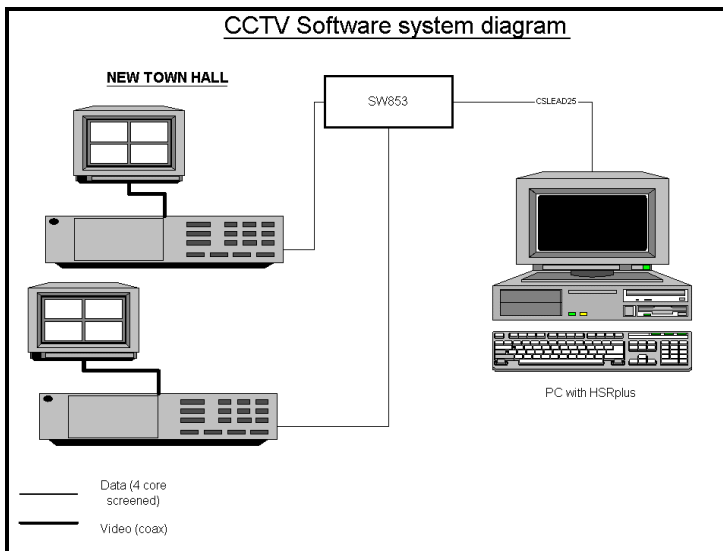

Options:

- ◆ **SITEMAP software:** This add on software package allows selection of cameras by clicking on a camera icon on a map layout. The camera icon can also trigger a function key allowing split screens or VCR functions to also be selected.
- ◆ **PC video card:** This allows the display of the digital recorder spot monitor output on the PC, reducing space requirements and saving the cost of a monitor.
- ◆ **Touchscreen:** PC operator control by touchscreen is possible with an optional PC monitor, further simplifying system operation.
- ◆ **Camfunction software :** This will add telemetry control of most popular PTZ control systems and dome cameras. It links to this software to switch cameras if required.

HSRPLUS software can be utilised in English, French, German, Italian, Spanish, Swedish or Finnish.

HSRPLUS is a major breakthrough in improving the operation of CCTV systems.

Hardware / Software	Minimum Requirements
PC & Display	Pentium 233Mhz or higher with SVGA.
PC Ram	128 MB or above
PC Hard drive	16 MB or above free
PC CD drive	4 x CD drive
PC Pointing device	MS mouse, touchscreen or Compatible pointing device
PC Parallel port	1 parallel port
PC RS232 Communications ports	1 mouse / Touch Screen port. 1 serial port for every seven Multiplexers . 1 serial port for every seven RS232 VCR's.
PC Operating System & Network	Windows 95, 98, NT, XP or Vista with TCP/IP protocol for network operation
Digital recorder	SONY HSR digital recorders
