

VISIO[®] DATA SHEET

VISIO is a Windows based software drawing package that is easy to use and get started with but has many useful features once you are familiar with it. Our symbols and images software packages require Visio to be installed on your PC. You can purchase Visio at the same time as you purchase the symbols and drawing software.

The standard VISIO package does not contain any pre-configured CCTV, Access control or Security specific symbols. It does come with symbols for map drawing, flowcharts and organisational charts.

VISIO has tools built in to allow total costings or a list of all equipment in your drawing to be created.

| Hardware / Software | Requirements |
|------------------------------|--|
